Technology Operations & Cybersecurity Professional improving secure, reliable, and efficient workflows

PROFESSIONAL SUMMARY

Cybersecurity graduate student with experience across technology support, security operations training, network troubleshooting, and technical documentation. Skilled at resolving access and system issues, reviewing logs and security scenarios, validating vulnerabilities, and turning findings into clear escalation notes, remediation steps, and reusable documentation. Focused on helping teams reduce technical friction, improve reliability, and maintain security-aware workflows.

TECHNICAL SKILLS

Security Operations: Alert triage, severity classification, false positive review, root cause analysis, incident investigation, escalation, remediation

Analyst Review & Writing: Security scenario review, investigation workflow review, detection logic review concepts, structured analyst feedback

Tools: Splunk, Wireshark, Nessus/OpenVAS, Nmap, Kali Linux, Metasploit, VMware, TeamDynamix, Okta, Microsoft 365

Frameworks & Networking: MITRE ATT&CK Framework, NIST concepts, SANS incident response lifecycle, vulnerability management, TCP/IP, DNS, DHCP, LAN/WLAN

CERTIFICATIONS

Google Cybersecurity Certificate – Google

Cyber Threat Management – Cisco Networking Academy

PROFESSIONAL EXPERIENCE

IT Service Desk Student Assistant

Dec 2025 – Present

Lewis University Office of Technology, Romeoville, IL

- Triage 40–50+ daily tickets involving identity/access, Okta MFA, Microsoft 365, endpoint access, connectivity issues, phishing reports, and security-sensitive user concerns.
- Investigate access failures, account lockouts, suspicious login behavior, and recurring issues; classify escalation need and document user impact, evidence, troubleshooting steps, and resolution in TeamDynamix.

IT Support & Security Operations Intern

Jan 2025 – Aug 2025

AlphaED, Hyderabad, India

- Supported 100+ users across Windows/Linux systems, VMware environments, virtual classroom platforms, and cloud-based learning systems.
- Reviewed network activity using Splunk, Wireshark, and packet analysis to investigate connectivity issues, unusual behavior, recurring patterns, and remediation steps.

Security Operations Training

Nov 2024 – Mar 2025

FullStack Academy – SOC Readiness Program, Hyderabad, India

- Completed hands-on SOC readiness training led by practicing analysts with enterprise security operations experience at TCS and Microsoft.
- Investigated realistic alert scenarios involving phishing, endpoint activity, network traffic, vulnerabilities, and incident response; assessed severity, root cause, false-positive likelihood, and next steps.
- Reviewed SIEM/log and network evidence, mapped observed behavior to MITRE ATT&CK Framework concepts, and prepared concise investigation notes with recommended response actions.

Cybersecurity Engineer Intern

Aug 2023 – Sep 2023

Huntmetrics Pvt. Ltd., Hyderabad, India

- Investigated vulnerabilities, misconfigurations, exposed services, and suspicious activity in controlled labs using Kali Linux, Nmap, Metasploit, Wireshark, VMware, and Nessus; documented remediation recommendations.

CYBERSECURITY COMPETITIONS

Capture the Flame CTF – University of Illinois Chicago

3rd Place, Apr 2026

Log analysis, network forensics, exploitation, vulnerability identification, and incident triage.

National Cyber League (NCL) – Team Games

Top 31 Nationally, Apr 2026

Network traffic analysis, cryptography, forensics, OSINT, password cracking, and web exploitation.

CyberForce Competition – U.S. Department of Energy

Top 84 Nationally, Nov 2025

Simulated enterprise defense, anomaly identification, service uptime, threat response, and remediation documentation.

EDUCATION

Lewis University, Romeoville, IL

Aug 2025 – May 2027

Master of Science in Cybersecurity | Current GPA: 3.66/4.00

Lords Institute of Engineering & Technology, Hyderabad, India

2021 – 2025

Bachelor of Engineering in Data Science | First Class with Honors
